PROFILE SUMMARY

Following an enjoyable career in transport and mechanical services, I now have the opportunity to pursue my interest in software development by completing my qualification this year. I believe my ranging knowledge and experience can further add to the success of any workplace I become a part of. I am trained in both front-end and back-end design and enjoy implementing software solutions across the complete development lifecycle of a product.

Coder Academy

Certificate III in AutoElectrical Technology   2021
Work Skills

Certificate III in HV Mech Technology   2020
Work Skills

Certificate II in Automotive AC Technology   2020
Work Skills

PROJECTS

Workshop Software Terminal App

https://github.com/LeithPrice/Workshop_Terminal_App

- A terminal based workshop management software that allows users to input customer and vehicle details which are permanently saved in a .txt file for ongoing use and then print to screen sales invoices for work performed.
- Features include customer information upload and retrieval. It also has redundancies for multiple data entries with the same registration, user input sanitisation and Ruby Gems are used for restricting menu navigation to yes or no input.
- File open, write and read was used with a .txt file for saving Information. I have since learned about JSON and APIs and would love to implement a better database system.
- Created in VScode using the Ruby programming language.

Revonate Rails App

- A prototype two-sided marketplace in which users can buy and sell project cars that require repair.
- Features include account set up and authentication using Devise ruby gem, listing uploads including photos and buy / sell history. Authorisation protocols are also in place for restricted CRUD actions.
- Created in Ruby on Rails with a PostgreSQL database and deployed using Heroku.

WORK EXPERIENCE

Mechanic – Auto Electrician / Self Employed   July, 2019 – Current
Maxwell Tyre and Mechanical, Griffin QLD

- Self employed, running a mechanical and auto electrical business.
- Diagnose complex mechanical issues through testing and troubleshooting.
- Communicate complex technical issues to non technical clients in a way they can understand..

Heavy Vehicle Mechanic   Feb 2020 – Nov, 2020
Scotts Refrigeration Logistics, Morningside QLD
